

## Creating a ChargePoint Account

ChargePoint is a popular charging station provider that you'll find in Michigan. Before you head out on a road trip, it's worth taking the time to set up an account and download the smartphone app to avoid extra time and frustration when you're ready to charge.

The process is free, easy, and covered in detail [here](#). Download the app for both iOS and Android at [chargepoint.com/drivers/mobile/](https://chargepoint.com/drivers/mobile/) to find charging stations, see if they're currently being used and, once charging, how much energy and costs you've accumulated.

Since some ChargePoint stations require payment, consider adding a form of payment to avoid future charging delays.
