

Coyne Oil & Propane is all about energy. They have been meeting the energy needs of homes and businesses in central Michigan since 1930. Their goal is to provide customers with the most reliable and courteous service every day and are forward-thinking about the future of energy – having already installed solar at each location and considering renewable sources for propane. That includes offering EV charging at their Mt. Pleasant Citgo station as well as their service centers. We caught up with Dan Coyne at the company headquarters in Mt. Pleasant to find out more.

What led Coyne to offer EV charging?

“My uncle was intrigued by the simplicity of electric vehicles due to fewer moving parts. So, he started researching EVs and charging.”
Every office now has Level 2 EV chargers for the public to use for free.

To help power those chargers as well as their own operation, Coyne added solar panels to their energy mix. All locations, including the convenience store and car wash, use power generated by highly efficient sun tracking solar panels, generating enough clean energy to power more than 100 Michigan homes.

Tell us about your partnership with the Consumers Energy PowerMIDrive program.

When a Consumers Energy [PowerMIDrive](#) public charger rebate became available in their area, Coyne jumped at the chance. Working with ChargePoint installation partner Westside Solutions, their flagship Citgo convenience store at 910 W. Pickard Rd in Mt. Pleasant now features two DC Fast Chargers.

What message do you want to send to EV drivers?

“Stay tuned for additional EV chargers!”
Coyne plans to invest in EV chargers beyond their current service locations.

Electric Fleets

Coyne is also enrolled in Consumers Energy’s [PowerMIFleet](#) fleet electrification program. Although there are not many electric medium to heavy duty trucks available on the market yet, Coyne is evaluating fleet electrification options.

We applaud Coyne Oil & Propane on their unique blend of tradition, service and innovation and look forward to continued partnership.

Station Host Profile

Coyne Oil & Propane

Locations

910 W. Pickard Rd., Mt. Pleasant
914 W. Pickard Rd., Mt. Pleasant
4968 M155, Cadillac
